EDUCATION

Bachelor of Computer Science Honours (Co-op)

University of Guelph

- Software Engineering major pursuing a minor in Business

Sept. 2023 - April 2028

Dean's Honours List - 3.7/4.0 GPA

TECHNICAL SKILLS

Languages & Frameworks: Java, Python, C, JavaScript, HTML/CSS, SQL

Systems, IT Support & Automation: Windows, Active Directory, Office 365, Power Automate, BMC FootPrints, hardware diagnostics & troubleshooting

Data & Reporting: Excel, Power BI, Python (Matplotlib, Pandas)

EXPERIENCE

IT Support Intern

TaylorMade Golf Canada

May 2026 - August 2026

Vaughan, ON

- Supported 200+ of ~400 Canada IT tickets; led a full asset audit across 120+ assets, improving register accuracy
- Built a Power Automate framework automating approvals across 9 processes, cutting manual tracking for ~180 requests/year
- Upgraded 30+ devices to Windows 11 and documented the process for future upgrade cycles
- Prototyped an AI-powered self-service assistant for SOPs, presented to the US IT team for rollout

Student IT Technician - Managed Desktops

University of Guelph, Computing & Communications Services

August 2025 - December 2025

Guelph, ON

- Resolved 150+ tickets with 95% first-contact resolution via BMC FootPrints across phone, email, and walk-ins
- Diagnosed and resolved Windows/macOS issues, including hardware diagnostics and component replacements
- Prioritized incident queues and coordinated with IT teams to meet SLA resolution times

IT Intern

Casa Foundation for International Development

May 2025 - August 2025

Toronto, ON (Hybrid)

- Redesigned the marketing operations portal in HTML/CSS/JS, improving load times 45% and UX 60%
- Partnered with Communications to define technical requirements and evaluate new tools
- Documented system changes and workflow improvements for non-technical stakeholders

PROJECTS

Mixtape Maker (E-Zine Edition) | *JavaFX*, *TypeScript* | [Repo](#)

May 2025 (ongoing)

- Developed a digital application integrating the Spotify API for track metadata and artwork; implemented MVC architecture with modular Java classes, reducing code coupling by 60%

Statistics Canada Data Analysis | *SQL*, *Python*, *Matplotlib* | [Repo](#)

February - March 2024

- Built an SQL-based analytics tool processing 5,000+ census records with 3 peers, cutting analysis time from 8 hours to 15 minutes by automating queries and visualization

VOLUNTEERING & EXTRACURRICULARS

Code Facilitator

Go Code Girl

August 2024

Guelph, ON

- Delivered Python instruction to 15 students aged 10-12, achieving 100% task completion rate and developing modular examples to simplify logic structures

Google Developer Student Club & Guelph Women in Computer Science Club

Sept. 2024 - Present

University of Guelph

- Completed hands-on projects and developed team-oriented skills through weekly technical workshops
